Now, a student can tell what is happening in a session, at a glance.

# Naming Sessions

## Naming Conventions for calendar sessions

### All sessions that are **help sessions**:

- By class: ME 2400 Assignment Help
- By Topic: Resume Writing Help
- By program: PHT Open Help

### All sessions that are **Topical LABs**:

- By class: CMS 1500 Form LAB
- By topic: CPT Basics and Tabbing LAB

Naming rationale:  
**HELP:** I can ask anything about the topic of the session.  
**LAB:** I am going to be taught something and then I can ask clarifying questions.

## Tags

Tags should be about topics only. In the current calendar, not all sessions are properly tagged, so searching by tag is useless. **Coding, Math, Insurance, Career, Science, Course, PHT, HHS, ALL**

We should avoid tags if they act as a limiter, i.e. tagging a writing help session as English or GenEd. If a student needs help with writing in another class, they may not attend the session.

Using the tag *open* has the same problem in obverse, when some sessions are tagged open, it implies that any session not tagged as open is not open.

ONLY USE TAGS TO CLARIFY EXPECTATIONS OR SORT.

## Session description
